Certificate of practical clinical elective

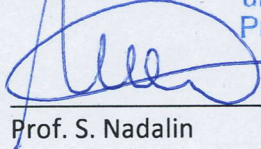

Dear Sir or Madam,

Miss Nozima Khaymatova, student of medicine, has gathered further experience after successfully having completed his practical clinical elective under my supervision and guidance during the months of July and August 2019 at the University Hospital of Tübingen at the Department of General, Visceral and Transplant Surgery, Germany.

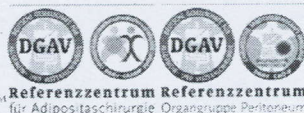

Miss Nozima Khaymatova during this time was involved in medical history taking, observing and performing physical examinations and procedures (e.g. blood sampling, change bandage, drainage removal, application of local anesthesia), participating in the discussion of clinical cases on the ward including the interpretation of determined lab parameters and gathered medical imaging data. She joined actively the shifts. In the operation room she observed and assisted in many different procedures in the broad field of general and visceral surgery. All tasks she was assigned with were fulfilled to our complete satisfaction.

We thank Miss Nozima Khaymatova for her interest regarding a practical clinical elective at our department and wish all the very best for the future concerning his further medical career.

Your sincerely,

Prof. S. Nadalin
